To Whom It May Concern,

It is with great pleasure that we provide this testimonial for Miranda Water Technologies. NMR Construction recently had the opportunity to collaborate with Miranda Water on the design and construction of a 1.6 million liter per day waste water treatment system based on their Miracell Green technology. From the initial Project discussions to the final installation, Miranda demonstrated exceptional professionalism, technical expertise, and commitment to excellence.

We are thrilled to report that, after six months of continuous operation, the system has not only met but exceeded our expectations. The waste water system is efficiently servicing over 14,000 people daily, and the quality of the output effluent is even cleaner than originally projected. The environmental benefits of this solution have been a stand out feature, and we have received positive feedback from the community regarding the improved waste water management.

Miranda Water delivered the project on time and on budget, which is a rare achievement in today's construction and development industry. Their team was transparent, reliable, and highly responsive to our need sthrough out the project. They consistently communicated with us, ensuring that any challenges were addressed promptly and that the Project progressed smoothly from start to finish.

The Miracell Green system has proven to be an outstanding choice for our needs, and we look forward to working with Miranda Water Technologies again on future projects. We highly recommend them to any organization in need of advanced and reliable waste water treatment solutions.

Sincerely,

Arch. Umut Gül

Technical Manager
